County Executive

Michael J. Nesheiwat, M.D.
Interim Commissioner of Health

FOR IMMEDIATE RELEASE

Date: April 11, 2017

Contact: Barbara Ilardi, Public Information Officer, (845) 808-1390

April 22 is Earth Day, Time to Recommit to Protecting our Planet *PCDOH Staff Volunteer Time to Commemorate Day with Early Clean-up and More*

Brewster, NY—When Earth Day began April 22 in 1970, there was no Clean Air Act, no Clean Water Act and no Environmental Protection Agency (EPA). Since then many successes have been won, but some of the largest challenges still lie ahead.

This year Earth Day Network has proclaimed a campaign for environmental and climate literacy. Tackling great challenges begins with smaller local steps. On Friday, April 21, Putnam County Department of Health staff will be out in the community at lunchtime, volunteering and cleaning roadside litter along the stretch of Route 312 near the main health department office. Additionally beginning Sunday, April 16, the department will be tweeting and posting information daily to spread the word and improve environmental and climate literacy.

“Roadside litter is more than an eyesore,” explains Vicki DiLonardo, the health department’s recycling coordinator. “It can harm wildlife and damage the water supply, and the quantity of roadside litter is staggering. Last year, the litter patrol operated by the PARC organization collected more than 26,000 pounds from 493 miles of Putnam County roadside.”

To reduce roadside litter, the health department runs a program that lends community members clean-up kits, complete with litter bags, litter “grabbers,” roadside safety instructions, safety vests and highway flags. Roadside cleanups are a great activity for community groups and neighborhood associations. Park and school campus cleanups are great community service projects for girl scouts, boy scouts and other youth organizations. For more information or to borrow a “clean-up kit,” contact the health department at 808-1390.

The litter clean-up program is one of a number of environmental improvement initiatives the health department spearheads. Last September the department launched a campaign to increase plastic film recycling in the county. Unlike bottles and cans, plastic film must be dropped off at a

store that collects it. Currently 25 drop-off spots in the county are required to collect plastic film, which includes store “carry-out” bags, shrink-wrap plastic (e.g. beverage cases, paper towels packs) and newspaper delivery bags.

Other environmental initiatives and events in Putnam County include a push for more residential composting, an easy and convenient way to reduce solid waste, and the Household Hazardous Waste Collection Days sponsored by the health department and the New York State Department of Environmental Conservation. These events provide a way for residents to safely dispose of environmentally hazardous materials (e.g. cleaners, pesticides, oil-based paint, automotive solvents, mothballs, gasoline, small propane tanks). The next one is scheduled for Saturday, May 6, in Fahnestock State Park. Electronic waste is not accepted at Household Hazardous Waste Collection Day. To get rid of “e-waste,” residents should call their local town for disposal instructions. To register for Household Hazardous Waste Collection Day, or for information on any other of these programs, call the department at 808-1390 or visit the website below.

For more information on the Earth Day Network, which brings together 55 environmental organizations and government agencies including the New York State Department of Environmental Conservation, visit www.earthday.org.

The Department of Health’s mission is to improve and protect the health of the Putnam County community, composed of nearly 100,000 residents. Core services include community health assessment, disease surveillance and control, emergency preparedness, environmental health protection, family health promotion and health education. For more information, please visit the PCDOH website at www.putnamcountyny.com/health or visit the social media sites on Facebook at www.facebook.com/putnamhealth, and Twitter @PutnamHealthNY.
