Putnam Schools Are Safe, Top School Cop Says

By PCC Staff | March 15, 2018

The coordinator of the county's School Resource Officer

Program, Sgt. Michael Szabo, reassured parents and students alike attending last week's Brewster Board of Education meeting

that schools in Putnam County were "safer than any other

schools across America due to the school resource officers

assigned to them."

Five of Putnam's six school districts (Empire State) with the Brewster District contracting for three of the highly trained deputies.

Each of Putnam's schools has an emergency response plan in place. Szabo said such strategies were filed not only with the Sheriff's Dept. but with other agencies overseeing jurisdiction with

the individual school be it State Police in Brewster, Philipstown or Patterson, Kent Police in Kent, Carmel Police in the greater Mahopac-Carmel area or Cold Spring Police in the greater Cold Spring area.

“We want to hear the ideas from you because you’re the people who are involved every day. You know what’s going on, you know what you do already with towns, with villages, with the county, with the state, with the schools, so there’s so many things happening already so we don’t want to go and do something that’s already been done. We want to talk about things that you think we can do now for the future.”

REAL ESTATE OPPORTUNITIES

Responsible Commercial Growth

- Inadequately treated sewage from failing or overused septic systems pose a significant health threat to us all
- The environmental impact due to septic issues is immense
 - Blue-Green Algae is one example
 - Putnam County, working with the NYS Governor's Office has launched a pilot program for Palmer Lake, Lake Carmel & Putnam Lake to reduce algae bloom

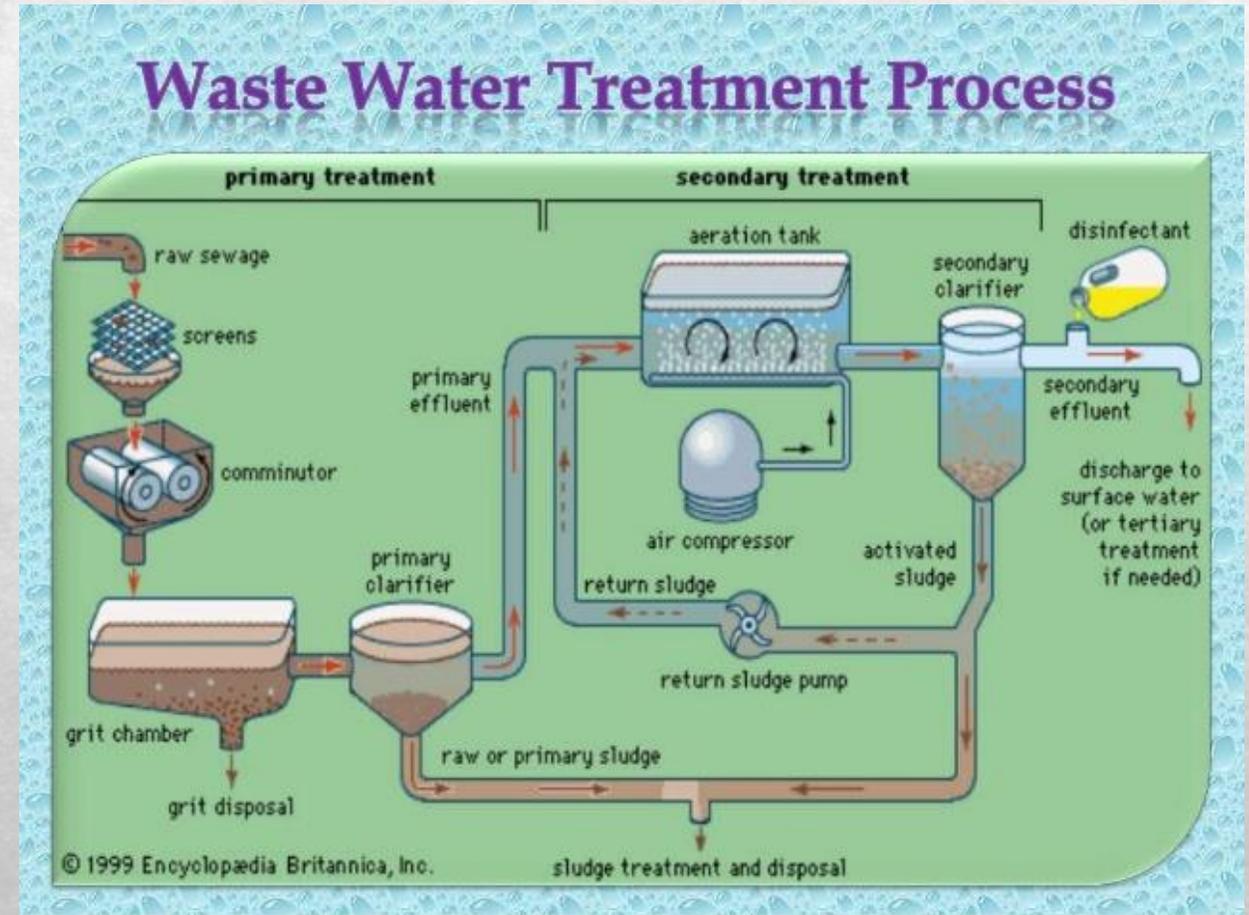

REAL ESTATE OPPORTUNITIES

Responsible Commercial Growth

Wastewater treatment projects help protect our environment and allow *responsible* commercial development and protect our residential areas

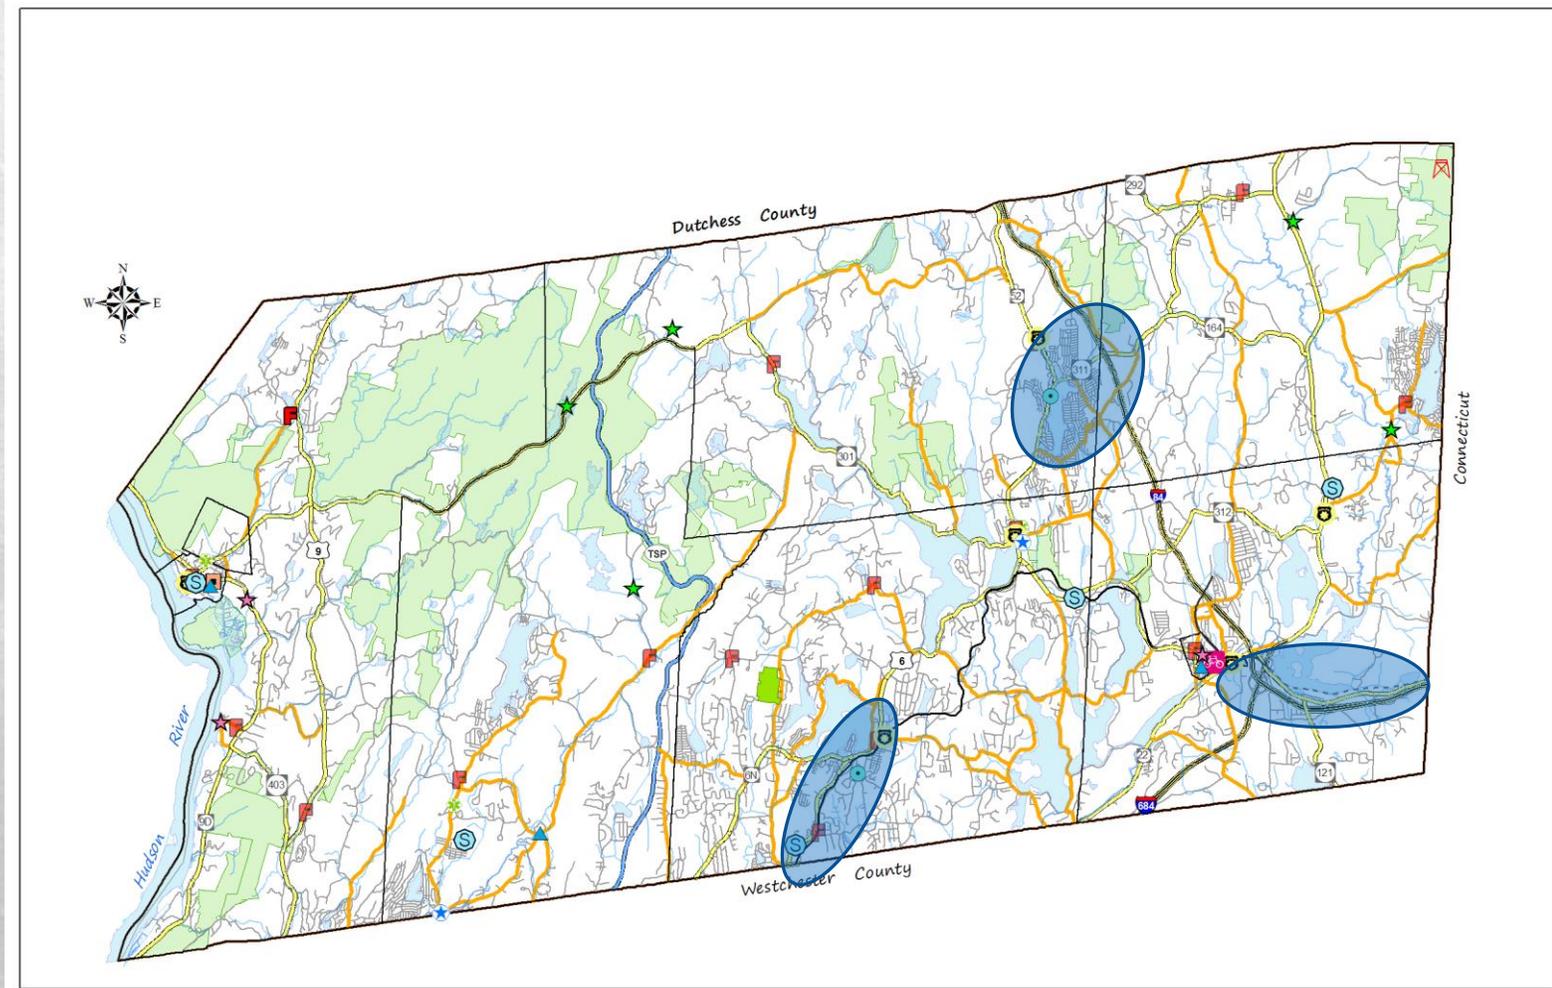

REAL ESTATE OPPORTUNITIES

Responsible Commercial Growth

Providing an effective wastewater treatment source is a responsible way to encourage commercial growth in areas that are properly zoned

Responsible Commercial Growth

- Another example of protecting our environment is the proposed wastewater plant in Kent
- Will eliminate old failing septic systems which have caused high phosphorus levels in Lake Carmel
- Will collect commercial and residential sewage from the Lake Carmel area including a portion of Patterson as well as allow for environmentally safe commercial expansion along the Route 311 & Route 52 corridors

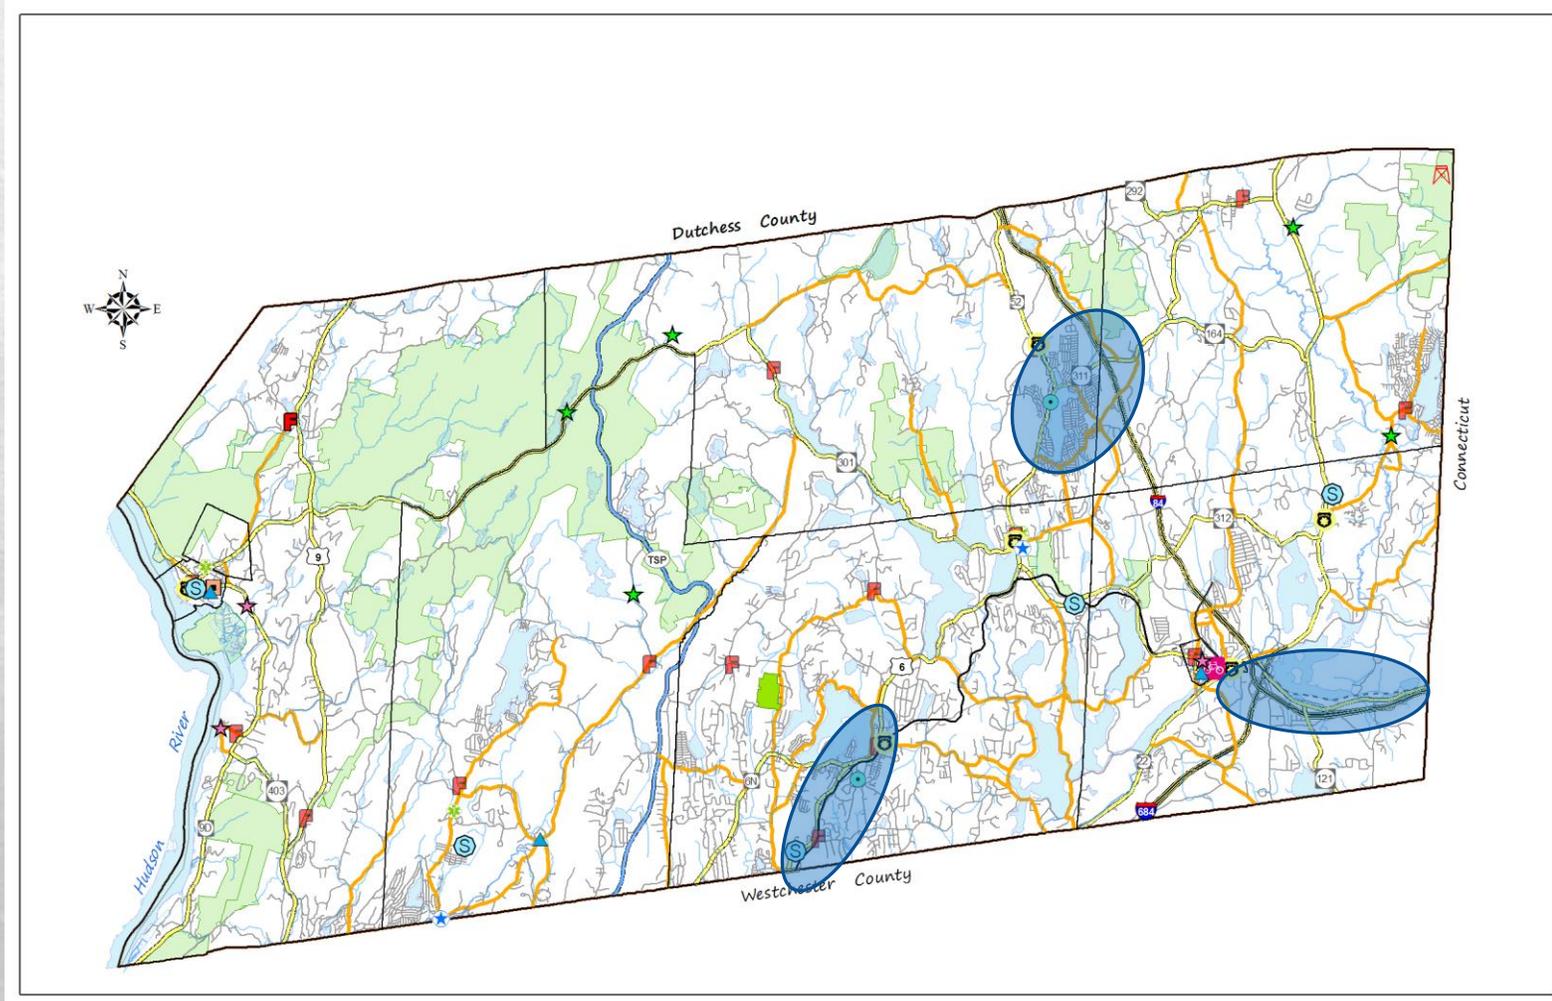

REAL ESTATE OPPORTUNITIES

For example Villa Barone Hilltop Manor has long lacked accommodations for overnight guests, extending the sewer line 2 miles north from Somers into Mahopac will make this a possibility

An investment in our community

The Center for Recovery Innovation

- We've asked the Putnam County Legislature to consider a Prevention/Recovery coalition with a single source of specialized care management for individuals seeking behavioral health and substance abuse services
- By creating a "No Wrong Door" system of care this will assist individuals with a "warm handoffs" that engage people in need without impeding access to care

It Is Not An Investment In A Single Organization, It's An Investment In Our Community
